

How did we come up with the name, Seventh Sense Consulting?

Seventh Sense Consulting's vision is to provide our clients with a heightened level of insights, methods, and tools for the advancement of:

1. Operations
2. Acquisition Workforce
3. Customer Outcomes
4. Market Intelligence
5. Analytics
6. Investment Management
7. Risk Management

In neurology, there is a category of senses called 'proprioception' which is beyond the 5 senses and provides the brain with knowledge on the movement and relative positions of the body. The presence or absence of this additional sense affects perception and coordinated activity.

Our company name reflects our vision to provide this heightened sense within the acquisition body of knowledge that increases perception and coordinates activities to deliver acquisition outcomes and government mission.
